

AYUSH SENGAR

Software Engineer | Backend / Java | SDET Background

8182000718 ayushsengar96@gmail.com [Linkedin](#) New Delhi, India

SUMMARY

Software Engineer with 5+ years of experience, including strong backend Java development expertise and a solid SDET foundation. Experienced in designing and optimising RESTful APIs, improving system performance, and working with large-scale enterprise payroll and HR platforms. Proven at leveraging AI-assisted development and automation to accelerate delivery, improve code quality, and reduce issue-resolution time. Adept at building scalable, reliable systems aligned with business objectives and user experience

EXPERIENCE

Software Engineer 2

Ultimate Kronos Group

06/2024 Noida, UP

Leading technology company focusing on workforce management and HR services

- Designed, enhanced, and optimised RESTful APIs using Java and Spring Boot, improving payroll processing and taxation workflows while ensuring high performance, scalability, and reliability.
- Accelerated feature development, refactoring, and defect resolution by integrating AI-assisted coding, automation, and monitoring practices, significantly improving delivery timelines and engineering throughput.
- Investigated code and SQL performance issues, optimising queries and resolving integration challenges in a complex monolithic architecture to improve system performance and maintain 99.9% uptime.
- Applied AI-driven debugging, log analysis, and automation techniques to improve root cause analysis and achieve 30–40% faster issue resolution.
- Designed and developed an AI-enabled payroll support chatbot for debugging workflows, automating repetitive tasks, and increasing engineering productivity.
- Gained extensive experience with complex business rules and mission-critical payroll logic in large-scale monolithic systems, supporting stability with effective monitoring and timely fixes.

Software QA Engineer 2

Ultimate Kronos Group

02/2024 - 06/2024 Noida, UP

Leading technology company focusing on workforce management and HR services

- Improved test coverage and QA processes, identifying critical bugs 40% faster and increasing overall software quality by 30% in 4 months.
- Developed and maintained API and integration test suites for backend services.
- Validated payroll flows, tax-related calculations, and end-to-end business scenarios using automated test frameworks.
- Reduced manual testing efforts while improving release confidence and production stability.
- Proactively identified high-impact defects before deployment, strengthening overall system quality.
- Implemented test automation strategies and robust test plans, reducing manual effort by 50%.

SKILLS

Backend & Programming:

Java SQL (MySQL) REST APIs

AI-Assisted Engineering & Automation:

AI-Assisted Development

AI-Driven Debugging

Intelligent Automation

AI-Powered Internal Tools

Frameworks

Spring Boot Spring MVC

Spring Data JPA (Hibernate) JUnit

TestNG

Testing:

Selenium Appium Postman

Frontend (Exposure):

React Next.js

KEY ACHIEVEMENTS

Ultimate Kronos Group Achievements

Received multiple performance awards (2 Bronze, 2 Silver, and 2 Appreciation recognitions) for outstanding contributions to the US Payroll Engine, AI initiatives, development excellence, and high-impact defect resolution

Vahan Technologies Achievements

5 Kudos for zero-defect feature delivery, cross-functional web/mobile automation, and consistent quality improvements

Vodafone Achievements

Company rewards for proactive learning, on-time delivery, and Innovation Platform Challenge innovation

EXPERIENCE

Software Development Engineer in Test - 1 and 2

Vahan Technologies India Private Limited

📅 05/2022 - 02/2024 📍 Bengaluru, KA

Innovative company focusing on AI and technology solutions for job applications

- Led end-to-end testing of WhatsApp chatbot, Android app, and web platform for job application and onboarding journeys
- Created and executed UI, functional, regression, integration, UAT, and API tests (Postman), including chatbot NLP and multistep flows
- Built automation for repetitive scenarios (Selenium/Appium/Java) and ensured consistent UX across devices and browsers

Graduate Engineer Trainee and Senior Executive

Vodafone (Vois)

📅 08/2020 - 05/2022 📍 Pune, MH

Global telecommunications company providing a wide range of communication services

- Enhanced release stability by 80% through automation of region-specific application workflows for Ireland, ensuring full regulatory compliance.
- Increased testing efficiency by 60% by implementing test automation across Web, iOS, and Android platforms, significantly reducing regression cycle time.

PROJECTS

RAQTKOSH (Next.js Full-Stack)

Developed AI blood matching to link donors/recipients by compatibility, availability, urgency, boosting match efficiency.

GitHub: [ragtkosh](#)

Airport Security System

Automated authentication boosts reliability, cuts manual checks.

EDUCATION

Bachelor of Technology

SRM Institute of Science and Technology

📅 08/2016 - 05/2020 📍 Chennai, TN

Masters of Technology

BITS Pilani WILP

📅 08/2023 - 05/2025
