

AYUSH SENGAR

Software Engineer

📞 8182000718 ✉ ayushsengar96@gmail.com 📍 New Delhi, India

SUMMARY

Software Engineer with 5+ years of experience specializing in Backend Java Development. Experienced in designing, developing, and optimizing scalable RESTful APIs, microservices, and enterprise applications for payroll, HR, and workforce management platforms. Proven expertise in improving system performance, enhancing application reliability, and delivering high-quality solutions using Java, Spring Boot, SQL, and cloud-based technologies. Skilled in leveraging AI-assisted development and automation to accelerate delivery, improve code quality, and streamline issue resolution. Adept at building scalable, secure, and maintainable systems aligned with business objectives and user needs.

EXPERIENCE

Software Engineer 2

Ultimate Kronos Group

📅 02/2024 📍 Noida, UP

Leading technology company focusing on workforce management and HR services

- Designed, enhanced, and optimised RESTful APIs using Java and Spring Boot, improving payroll processing and taxation workflows while ensuring high performance, scalability, and reliability.
- Accelerated feature development, refactoring, and defect resolution by integrating AI-assisted coding, automation, and monitoring practices, significantly improving delivery timelines and engineering throughput.
- Investigated code and SQL performance issues, optimising queries and resolving integration challenges in a complex monolithic architecture to improve system performance and maintain 99.9% uptime.
- Applied AI-driven debugging, log analysis, and automation techniques to improve root cause analysis and achieve 30–40% faster issue resolution.
- Designed and developed an AI-enabled payroll support chatbot for debugging workflows, automating repetitive tasks, and increasing engineering productivity.
- Gained extensive experience with complex business rules and mission-critical payroll logic in large-scale monolithic systems, supporting stability with effective monitoring and timely fixes.

Software Engineer 1

Vahan Technologies India Private Limited

📅 05/2022 - 02/2024 📍 Bengaluru, KA

Innovative company focusing on AI and technology solutions for job applications

- Developed and maintained backend services and REST APIs using Java and Spring Boot to support job application and onboarding workflows across WhatsApp chatbot, Android, and web platforms.
- Built business logic and microservices ensuring high availability and reliability. Integrated databases for seamless experiences.
- Integrated third-party services for secure frontend-backend interactions.
- Optimized API performance, database queries, and backend workflows, improving application responsiveness and system stability.
- Collaborated with product and engineering teams to design new features, enhance system architecture, and deliver scalable backend solutions.

SKILLS

Backend & Programming:

SQL (MySQL, PostgreSQL)		Java
REST APIs	Spring MVC	Spring Boot

AI-Assisted Engineering

AI-Assisted Development

AI-Driven Debugging

Internal Developer Tools

Cloud and Tools

AWS S3	API Integrations	Flyway DB
--------	------------------	-----------

Frontend (Exposure):

React	Next.js	Tailwind CSS
-------	---------	--------------

KEY ACHIEVEMENTS

🏆 Ultimate Kronos Group Achievements

Received multiple performance awards for outstanding contributions to the US Payroll Engine, AI initiatives, development excellence, and high-impact defect resolution

🏆 Vahan Technologies Achievements

Received multiple Kudos awards for outstanding contributions, cross-functional collaboration, and continuous improvements in platform reliability and engineering excellence.

🏆 Vodafone Achievements

Company rewards for proactive learning, on-time delivery, and Innovation Platform Challenge innovation

PROJECTS

RAQTKOSH (Next.js Full-Stack)

Developed AI blood matching to link donors/recipients by compatibility, availability, urgency, boosting match efficiency.
GitHub: [raqtkosh](#)

EXPERIENCE

Graduate Engineer Trainee and Senior Executive

Vodafone (Vois)

📅 08/2020 - 05/2022 📍 Pune, MH

Global telecommunications company providing a wide range of communication services

- Improved application stability by 80% by developing and optimizing region-specific backend services and APIs for Ireland, ensuring regulatory compliance and seamless user onboarding workflows.
- Enhanced backend integrations & API services, boosting performance, scalability, & efficiency in various business applications.

PROJECTS

Industrial Marketplace

Built a scalable B2B marketplace (React + Spring Boot microservices) with role-based workflows, Dockerized deployment, and monitoring via Prometheus & Grafana

GitHub: [Industrial Marketplace](#)

USHA Medicals (Full-Stack E-Commerce)

Created healthcare e-commerce platform with React/Next.js, Java Spring Boot, PostgreSQL. Integrated Razorpay for secure payments, Shiprocket for logistics, AWS S3 for media storage. Live Site: [Arthritis Medicine](#)

EDUCATION

Bachelor of Technology

SRM Institute of Science and Technology

📅 08/2016 - 05/2020 📍 Chennai, TN

Masters of Technology

BITS Pilani WILP

📅 08/2023 - 05/2025
